

Editor:

Journal of Scientific and Technological Research Industrial

Vol. 4 Num. 2 – 2023

The Journal of Scientific and Technological Research Industrial - Professionals On Line, allows the publication of articles in all areas of Industrial Engineering and its applications; Summaries of master's and doctoral theses, technical opinions, book reviews and conference articles are also published after acceptance by the Editorial Committee.

The journal is published biannually in Spanish, Portuguese and English in digital format, the latter presentation being free. The articles that are submitted to the arbitration of the INDUSTRIAL ENGINEERING journal must be original and unpublished, and cannot be submitted for simultaneous consideration of evaluation in another academic or professional journal, nor may they have been partially or totally published in another journal.

The received articles are subjected to a review of similarities, with the Turnitin software: up to two continuous lines of similarity with another document are accepted.

If an article is accepted for publication, the Editor will request authorization to publish the article by express letter.

The journal is aimed at researchers, teachers and professionals in the field of engineering, with an international scope and participation.
